The phonetics and voices are very important in the Al Bakiyye Alphabet. For Example;

“᠋” is read as “en” and we have to use it also for “en”.

“*Enulu*” (The biggest) should be written with Al Bakiyye letters so: “᠋᠋᠋” The word starts with “᠋” (n), not “᠋” or “᠋”.

Al Bakiyye Alphabet and Basic Writing Rules

It is written from left to right. The computer’s letter does not combine with iceother.

There are special letters and characters in the Al Bakiyye alphabet for “*that*” proposition and “*-un, -en, -an, -on, -in*”.

- That: ᠋
- -en, -an, -in, -ın: ᠋
- -on, -un, -ön, -ün: ᠋

All letters have special forms and phonetics. When we write a word in the Al Bakiyye alphabet, we should use them. For Example:

Arayba (Car) :᠋ IL (“᠋” letter is “r” in Latin alphabets. But we use this letter for “er” and “ar” voices. The first voice “A” is not written in this word.

There are special letters also for To Be. For “is”: “᠋ ᠋”, for “war”: “᠋᠋” and for “-dir”

(This to be is only for Al Bakiyye Conlang): “᠋”.

Most of the time the vowel letters are not written. We use the consonant letter with their special voices and phonetics. But we must write all vowel letters at the end of the word.

Names (Aden)

All pronouns must be written with an article and the first letter must be uppercase in Latin Alphabets. There are 2 type pronouns; Special pronouns and generic pronouns. All generic pronouns can be used as verbs too.

1. with adjectives,
2. with special names,

Because it is a language that is read as it is written and written as it is read.
- e. If you use the basic word from Adjective and verb, you can create a new word with Türetek Table as well as.

- f. If you want to create a new word for Al Bakiyye for the other foreign word, the first step is using the Verbs and creating it with the Türetek Table. The Creator of Al Bakiyye prefers that we create a new word with this method.
