Highlights of Changes in 3.1.14.48

ID: 8920 Support sync Point Transaction by cut off date.

Due to some company that have been using AutoCount for years, when they open new outlet, system will sync day 1 point transaction till up to date which caused sync timeout or failed depend on the size of the transaction. Now we have include this new feature to allow system to cut off till which date to start sync the point transaction at **Point of Sales > POS Setting**.
