4780	Support printer selection for print Order Slip.

Document Prepared by CY

Last Modified 25th September 2019

Highlights of Changes in 1.1.3

ID: 4743 Support print Order Slip

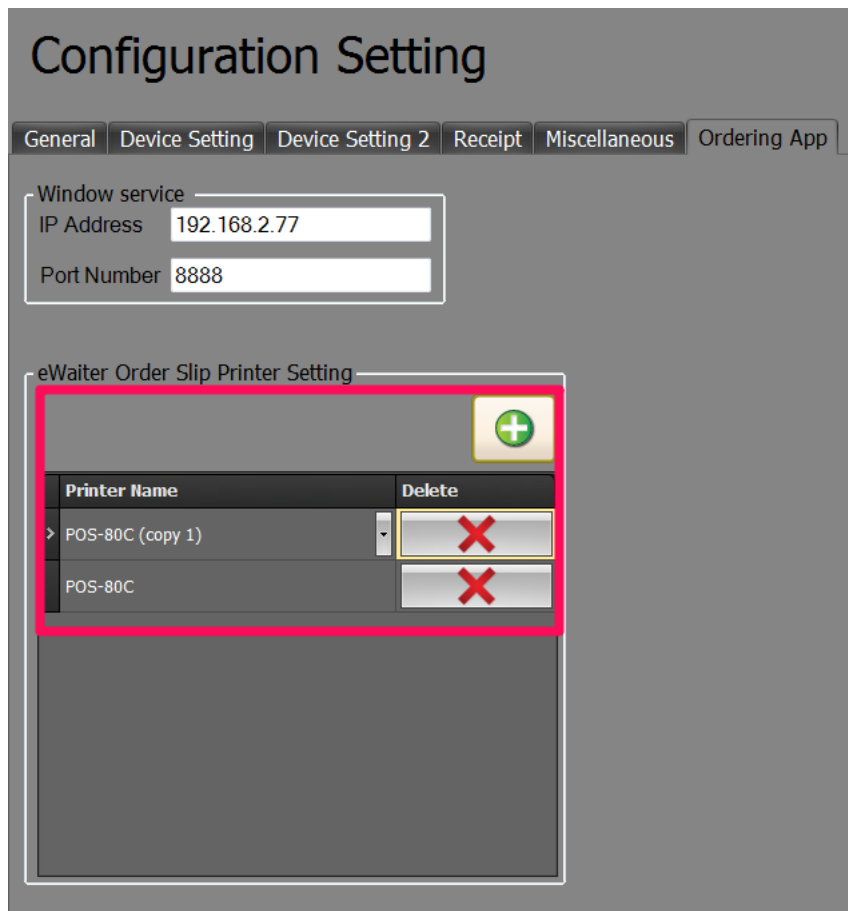

In this version, after user placed order through our eWaiter apps, the Order Slip will be printed out from server as well.

ID: 4780 Support printer selection for print Order Slip

User is allowed to select which printer to use for print out the Order Slip.

In FnB front-end (*Main PC*), go to *More Function > Settings > Configuration Setting > Ordering App tab*.

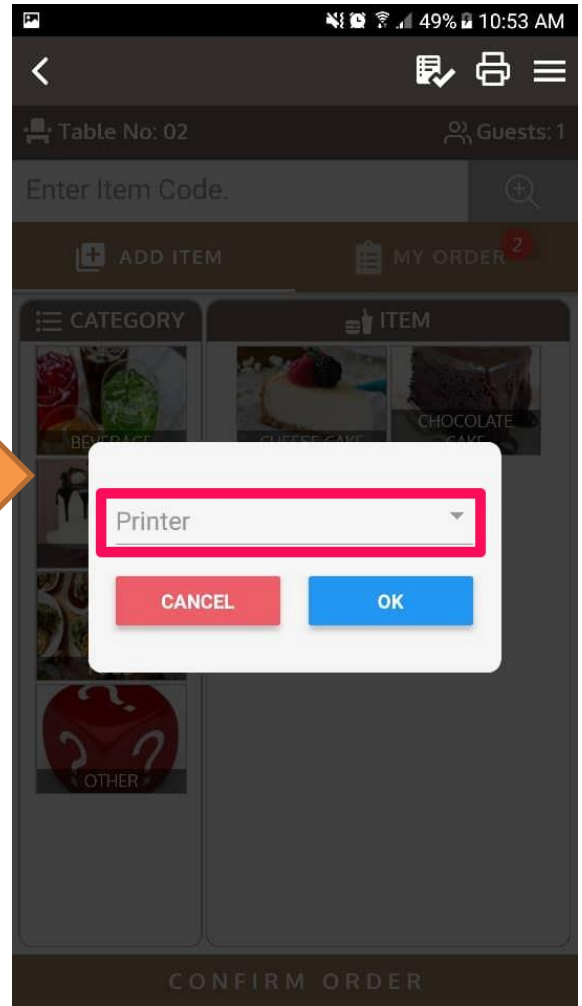

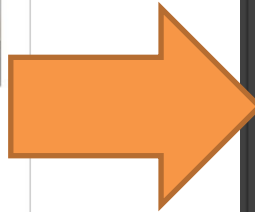

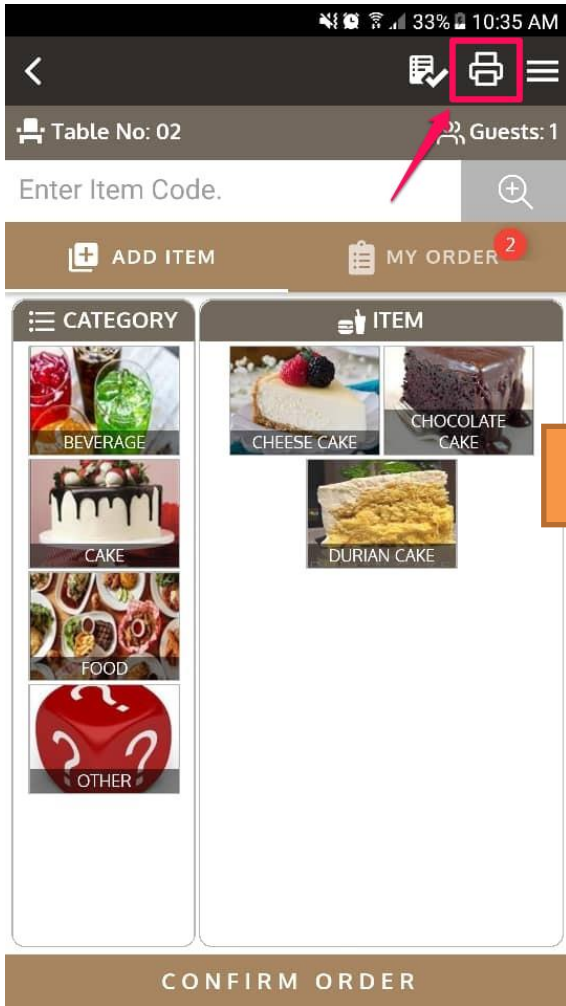

Under *eWaiter Order Slip Printer Setting*, add in the printer you want to use for eWaiter to print out Order Slip. You may add in multiple printers here if you have multiple eWaiter user and each user want to print using different printer.

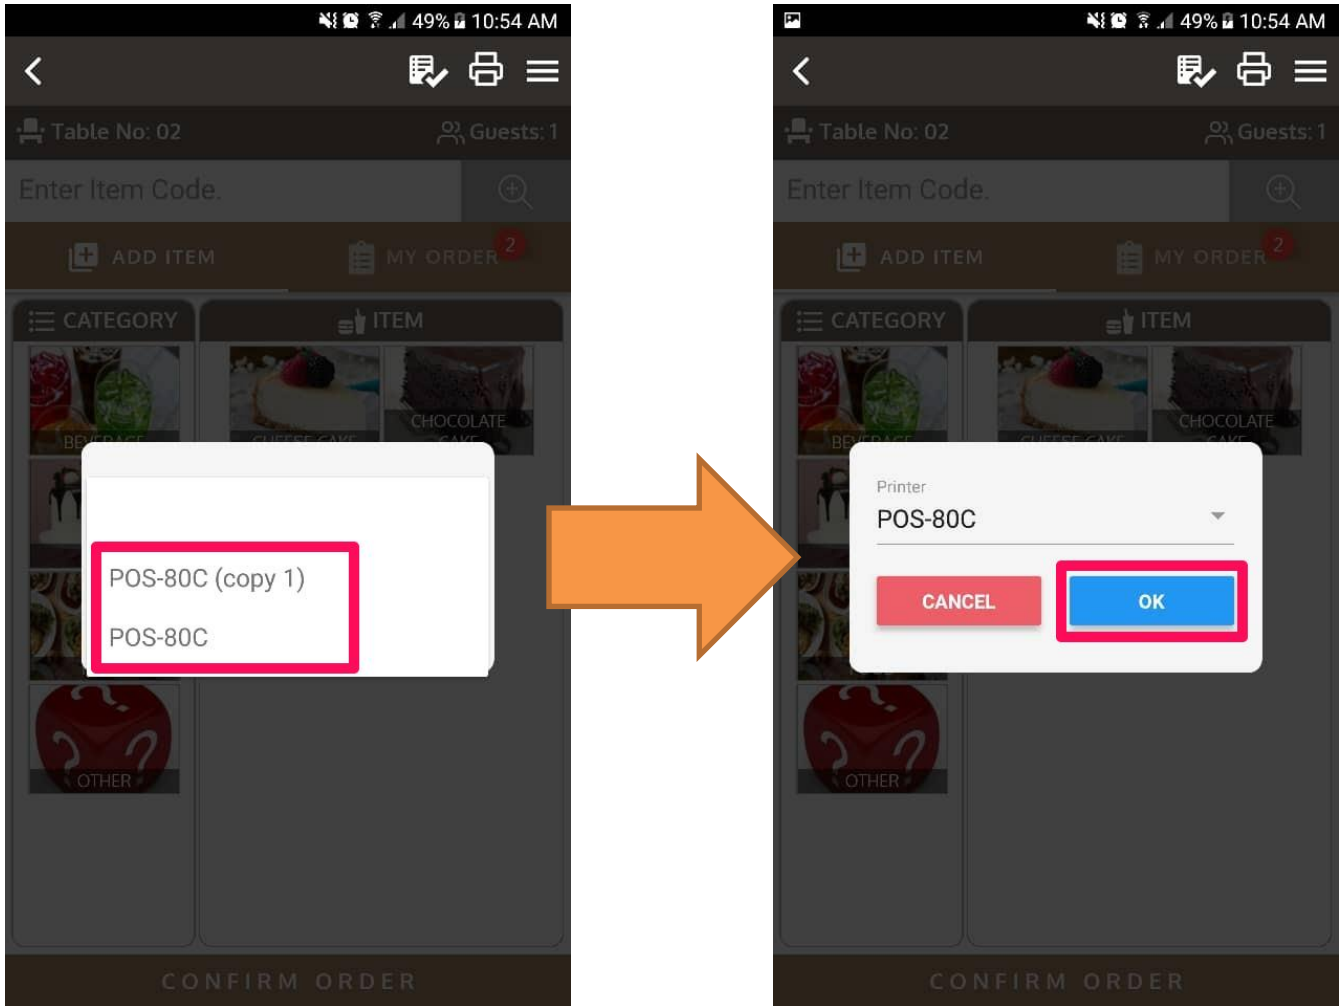

Note:

- Please perform this setting at FnB Front-end *Main PC* only.
- Only support Local Printer and Network Printer, Shared Printer is not supported.

In your eWaiter apps ordering screen, press the printer  button. Printer selection form will then prompt out.

Select the printer you want to use for print out the Order Slip and then press **OK**. This setting will save on the local device, so that user doesn't have to select printer every time.

After that, Order Slip will be print out successfully from the selected printer.

Note: Only support Local Printer and Network Printer, Shared Printer is not supported.
