

## Highlights of Changes in 2.0.23.172

### Print Count column at Cash Book Report Design

User can now access **“Print Count”** for Cash Book transactions. It had been added into Cash Book Report Design for user to drag out this column for printing purpose (Refer Figure 1). It is available in both Receipt Voucher and Payment Voucher type transactions.

### Enable Thread Form option at Current User Setting

A new option – Enable Thread Form had been added into Current User Setting. User can find this option at **Menu → Tools → Current User Setting** (Refer Figure 2). This option is to switch the behaviour of Accounting 2.0 from single thread to multi-thread. Multi-thread by means that user able to access other forms or windows (like Accounting 1.9) even if there is certain form or windows that require actions from users.
