Release Note CP 1.0.52

Enhancement

1. Added pro-rate option in leave type.
   Go to Tools > General Maintenance > Leave Type > Disable Prorate

When disable prorate is tick, those with resign date employee, the leave type entitlement won't be prorated based on employee's resign date. Usually, can be setup on medical leave and hospitalization leave.

2. New Employee Report > Addition and Deduction Listing Report.
   Go to Reports > Employee Report > Addition and Deduction Listing Report

3. Enhance service fees calculation screen.

Bug

1. Fixed showing BIK when creating new company during select copy from other company option.
2. Fixed filter function not working on employee batch edit for employee code column.
3. Fixed payroll variance report showing "report is empty" error when preview.
4. Fixed requested my approval > employee on leave information showing incorrectly at mobile apps.
5. Fixed claim request listing report, the details didn't follow the index no in claim type setting.
6. Fixed my attendance, the clock out address info not showing in mobile apps.
7. Fixed error message warning for 'leave type is required' when create new employee or by excel import employee details.
