8. Fix Credit Control not considering 5 cents rounding.

Enhancement Added:

1. Support WinRAR version higher than 5.40.

Highlights of Changes in 1.9.6.21

Support WinRAR version higher than 5.40

One of the major enhancements in this AutoCount Accounting is that it now supports WinRAR which is higher version than 5.40.

Currently some of the third-party antivirus software will attempt to update the PC WinRAR version to latest and causes some of the user to not able to perform backup as usual.

This error mainly refers to:

[https://wiki.autocountsoft.com/wiki/Troubleshooting: Backup error - File is not a valid archive. I/O error occur](https://wiki.autocountsoft.com/wiki/Troubleshooting:_Backup_error_-_File_is_not_a_valid_archive._I/O_error_occur)

This will be a good solution for users will be updating their AutoCount Accounting to Revision 21 which able to support higher version of WinRAR and do not have to worry any auto updates that disrupt their WinRAR version anymore.
